Summary

DevOps, Platform & Site Reliability Engineer with 4+ years of experience designing, automating, and managing enterprise-scale CI/CD, cloud-native, and platform engineering solutions supporting 700+ engineering teams. Expertise in Jenkins, GitLab CI/CD, Terraform, Ansible, Docker, Kubernetes, AWS, observability, Infrastructure as Code (IaC), and enterprise automation with strong focus on reliability, scalability, governance, and operational efficiency. Proven experience in architecting standardized deployment frameworks, Kubernetes platforms, AI-enabled engineering solutions, cloud infrastructure automation, release engineering, and monitoring systems that improved engineering productivity by up to 60% while maintaining platform availability of 99.95%.

Experience

Senior Infra Operations and Services

Nomura — Senior Analyst

Aug 2024 – Present
Mumbai, IN

Python . Unix . Ansible . Jenkins . Gitlab CI . Terraform . AWS . Docker . Kubernetes . Nexus . SonarQube . JIRA . ITIL

- **AI-Enabled Metadata Engineering & Platform Modernization:** Spearheaded the creation of an enterprise metadata intelligence solution by integrating data from **10+** DevOps, CI/CD, and middleware platforms into blockchain-backed database systems powering internal AI-driven platforms, reducing manual effort by **45%**, improving metadata accessibility by **60%**, and leading a team of **4 engineers**.
- **Container Platform Standardization & CI/CD Engineering:** Designed enterprise-grade GitLab CI parent pipelines and deployment frameworks leveraging reusable Docker container templates, enabling **700+ engineering teams** to onboard standardized language-specific deployment pipelines while improving deployment efficiency by **60%**.
- **Kubernetes Platform Reliability & Cloud-Native Operations:** Managed Kubernetes-driven enterprise workloads across cloud and on-premise environments, focusing on container orchestration, autoscaling, ingress configuration, observability integration, and reliability engineering initiatives to maintain **99.95% platform uptime**.
- **Cloud Platform Enablement & AWS Deployments:** Developed standardized CI/CD frameworks using Jenkins and GitLab pipelines for AWS-based application delivery, enabling engineering teams to adopt secure and scalable deployment models with IAM governance, billing controls, cost optimization, and infrastructure compliance, reducing onboarding effort by **55%**.
- **Mobile CI/CD Automation & Release Engineering:** Designed reusable CI/CD deployment pipelines using Ansible, Jenkins, and GitLab for Android and iOS applications, automating build, signing, testing, and release workflows; reduced manual release effort by **65%**, improved deployment reliability by **70%**, and accelerated application delivery cycles.
- **Infrastructure as Code & Automation:** Designed reusable Terraform and Ansible modules across AWS and private cloud environments, delivering **35% operational efficiency gains**.
- **Third-Level Platform Support & Reliability Engineering:** Led L3 support, availability, capacity, performance, and security initiatives for 7+ enterprise CI/CD and middleware tools supporting 700+ engineering teams, maintaining **99.95% service availability**.
- **Observability & Performance Optimization:** Architected a Grafana-based monitoring and alerting ecosystem with capacity forecasting, reducing **mean time to recovery (MTTR)** by **35%**.
- **ServiceNow Platform Operations:** Supported ITSM workflows including incident, change, and service request processes, collaborating with ServiceNow teams on access control reviews, integrations, and operational stability.
- **Enterprise Operations & ITIL Governance:** Managed 270+ annual production (Sev 2/3/4) incidents, releases, and change events, ensuring SLA compliance and zero critical audit findings.
- **Vendor & Stakeholder Collaboration:** Worked with internal teams and external vendors to troubleshoot complex platform issues and implement production changes with global impact.

Support Analyst

Wiley Edge (Client: Nomura)

Jul 2022 – Aug 2024
Remote, United Kingdom

Jenkins . Nexus . SonarQube . Docker . Gitlab . Python . Unix

- **DevOps Support & CI Automation:** Supported Jenkins CI environments, troubleshooting pipeline failures and resolving **20+ incidents per month** while maintaining **99.9% uptime**.
- **Automation & Scripting:** Developed Python and Bash scripts to automate operational tasks, reducing repetitive manual effort by **30-40%**.
- **Containerized Workloads:** Assisted teams with Docker-based builds and Kubernetes deployments, improving application portability and deployment reliability.
- **Version Control & Collaboration:** Worked closely with development teams using Git-based workflows to streamline code integration and release processes.

Backend Developer Intern
MFL Educlub

Jan 2021 – Dec 2021
Remote

SQL . C Sharp . ASP.NET

- **Backend Application Development:** Developed and maintained backend modules using **C#** and **ASP.NET**, supporting web-based application functionalities and improving application stability and performance.
- **Database Design & SQL Development:** Designed and optimized SQL queries, stored procedures, and relational database operations to ensure efficient data retrieval and processing.
- **API & System Integration:** Assisted in integrating backend services and APIs with frontend components, enabling seamless communication between application layers and improving data consistency.
- **Bug Fixing & Performance Optimization:** Collaborated with the development team to troubleshoot application issues, resolve bugs, and optimize backend workflows for improved reliability and maintainability.

Education

Bachelor of Technology – Computer Science and Engineering
Veer Surendra Sai University of Technology

2018 – 2022
CGPA: 9.06

Technical Skills

CI/CD and Automation:	Jenkins . Git . GitLab CI . Ansible . Terraform
Cloud Platforms:	Amazon Web Services (AWS) . Azure (basic exposure)
Containers and Orchestration:	Docker . Kubernetes
Monitoring and Logging:	Grafana . Prometheus . Splunk
Programming and Scripting:	Python . Bash Scripting . YAML . SQL
OS and Networking:	Linux . Windows . TCP/IP . DNS

Achievements

- **Nomura Star Awardee** — recognized for CI/CD reliability, automation, and infrastructure optimization contributions.
- Columbia University Certified Software Developer
- Mentor @ Astrosonic (guided 15+ learners)
- LeetCode — Solved 850+ algorithmic problems.
